

NO. 65

NEWSPAPER ARCHIVE®

DAILY NEVADA STATE JOURNAL

PRICE OF DAILY JOURNAL,
12 1/2 CENTS PER WEEK.

TOWN AND COUNTY.

BREVITIES.

Tremont Hotel meals 25 cents.
Try the Tremont Hotel croquet grounds.
Reno will celebrate the Fourth in grand style.
Go to the Tremont Hotel, chicken dinner Sunday.
Five passenger trains leave the Reno depot every morning.
Sullivan and Kilrain will come together a week from Monday.
The hay crop at Lovelock is much larger than anticipated.
Wanted at the Tremont Hotel a number of good men for ranch work.
C. H. Ordway, of Virginia, is in town, with a view to settling here.

The cloudy weather of yesterday cooled the atmosphere considerably.
The crops on Pyramid Lake Reservation are unusually abundant this year.

A home guard will be organized to turn out in the procession on the Fourth.

T. K. Stewart is running the line between Washoe and Ormsby counties.

Lange & Schmitt have placed a new side-walk down in front of their store.

The Journal job office is turning out as fine work as can be done in the State.

Every merchant should represent his business in the Fourth of July parade.

Read the Fourth of July programme. Reno will have a big time on that day.

The game of baseball between the Truckee and Reno nines will be played in Evans' field Sunday.

Remember the dance to be given by the ladies of Reno, next Tuesday evening, for the benefit of the Public Library.

The three passenger trains arriving here so near together in the morning make the town look lively around the depot.

The Reno boys should bear in mind that they will have to play ball next Sunday to win the game from the Truckeites.

Another fare bank will probably be started in a day or so. It is likely to be located up-stairs in the Russ House.

The fruit received in Reno so far this year does not appear to come up to the standard, but the vegetables are A. 1.

Col. E. H. Lindsay returned yesterday from a professional trip to Oroville, Cal. Bob says it is a lovely country down that way.

The Candelaria nine defeated the Hawthorne nine on Saturday last by a score of 18 to 13. The game was for a purse of \$100.

S. R. Young, who has been commissioned Notary Public to reside at Lovelock, has filed his bond and is now ready to transact business.

The First National Bank has contracted with George E. Holesworth to build a two-story brick 40x60 in the rear of the bank building.

Charles Chuco ich, of the Russ House, has just completed an elegant porch in front of that place to replace the one damaged by the big fire.

A large number of the young ladies attending the Bishop's School for Girls left yesterday morning for their several homes to spend their vacations.

T. R. Hofer, Cashier of the Bullion & Exchange Bank, came down from Carson Wednesday night to meet his sister-in-law, who came from the East yesterday morning.

There was every indication of a storm yesterday morning and part of the afternoon. A cold wind swept through the town and a few drops of rain fell, but toward evening the weather cleared.

Quite a crowd attended the dance given in Armory Hall by the Reno Baseball Club last night. The music by Hastings' band was good, and the boys will net quite a little sum of money.

The guns, caissons, and other material required for the equipment of Battery A, of Virginia, were received from Carson Tuesday, together with 20 new Springfield rifles for target shooting.

Dr. J. A. Lewis and the Misses Lewis, T. K. Stewart and wife, Geo. B. Hymers, Miss Annie Becker and a lady friend, left yesterday morning in a four-in-hand for a five days' visit to Lake Tahoe.

Mrs. P. C. Chester, Miss Louise Chester, Miss Lyonberger and Miss Emma Wall, of the Faculty of the School for Girls, left yesterday morning for Philadelphia and New York to spend their vacations.

W. S. Fender Lodge, Brotherhood of Railroad Brakemen, was instituted at Carlin Monday night by Grand Master Wilkenson of the Order. The Lodge has a large number of charter members.

The S. F. Report says: "Several of our prominent stockbrokers will visit the Comstock during the Fourth of July vacation and will try to find out what is preventing the market from advancing."

Pneumonia has proved fatal in many cases among the Putes on the Pyramid Lake Reservation, due to the fact that the Indians refuse to have any person except their own "medicine men" prescribe for them.

The new name for bartender is dispenser of beverages and compounder of life-giving elixir; rather a lengthy title, but still expressive. The most polite kind are in attendance at the saloon of S. L. Cohoon, of the Wieland Bottling Works.

The Silver State says: "Money is being collected here for foreign missions, while hundreds of Plute Indians, who are as benighted as any tribe in the interior of Africa roam through the country unenlightened and unchristianized."

LASSEN'S PEAK.

Indications that Promise a Volcanic Outburst.

The Virginia Enterprise, of Wednesday, contains the following:
A dispatch from Susanville, published in the Enterprise of yesterday morning, was to the effect that that place has been in almost a constant tremor since the nineteenth instant. The earthquake shocks have averaged from ten to twenty every twenty-four hours. The shocks are from east to west. Honey Lake valley, in which the town of Susanville is situated, lies in a great bend of the main range of the Sierra Nevada mountains. For a great distance south of the valley the Sierras run due northwest, culminating in Lassen's butte or peak. At the peak the range turns squarely to the northeast until east of Honey Lake valley, when it turns to the north, which course it holds until after it has entered Oregon.

LASSEN'S PEAK.

Susanville is thus surrounded on three sides by a great range of hills directly east of Lassen's peak. This peak rises to a height of over 10,000 feet above the level of the sea, and is volcanic. It is the central point in the greatest volcanic region in the whole Sierra Nevada range. From its summit forty extinct craters can be counted and twice as many can be found to the north, south and east along the range.

CINDER CONE.

Prominent among these is Cinder Cone, about two miles southeast of Lassen's peak. This was in an active state in 1850. The cone rises to the height of about 600 feet above the level of the elevated plateau on which it is situated. It has a crater 600 feet in diameter and 100 feet deep. It was last in eruption in the winter of 1850, when it darted flames to an immense height. These flames were visible for several nights in succession from Red Bluff, from Rich Bar, on the north fork of the Feather river, forty miles distant, and also from Angels Camp, 150 miles to the southward.

THE ADVENTURE OF TWO PROSPECTORS.
In the Spring of 1851 two prospectors, who had ventured up into the then unexplored wilds of this part of the Sierras, found the crater at Cinder Cone still active. They also saw vast columns of flame shoot up from the midst of a lake of boiling water and mud.

They were still on fire, and the curiosity of the two men came near costing them their lives. In making their retreat they traveled several miles over rocks that were hot enough to burn their boots. They lost a horse and a pack-mule, and were glad to get out of the burning region with whole skins.

LAKE SOLFATARA.

Was probably the first-spouting lake seen by the venturesome prospectors. It is situated about eight miles south of Cinder Cone and a mile east of Lassen's peak. It is 5,000 feet above the level of the sea, is of an oval form and covers an area of about four acres. It is surrounded on all sides by a rim 100 feet high, but on the north side a fissure that cuts through the rim gives access to the hot water. This is really a semi-active volcano. The crater is filled with hot, creamy water, through which jets of gas are sent up from time to time. Around the borders of the so-called lake rise (to the height of several feet) little puffing mud cones.

SNAG LAKE.

This lake derives its name from the fact of its being full of dead trees. It lies twelve miles northeast of Lassen's peak, at an elevation of 6,000 feet above the level of the sea. It was formed by the upheaval of lava in the winters of 1850-51. The lava upheaval at this time of the eruption was not of the threatening, flaming kind. It was in the shape of a mass of broken, semi-molten material that was pushed up through deep rents in the mountain. A mass of this pushed up in an east and west course for a distance of nearly two miles across the outlet of a little timbered valley formed the lake. The lava wall is deep and as it sits on top as a railroad embankment. The reservoir that formed behind this bank killed all the trees that covered the little mountain valley. That this lava was very hot is shown by the burned and charred trunks of the trees it surrounded. To the northwest of Cinder Cone a patch of about 100 acres of forest was covered with ashes and the trunks of the trees charred and burned.

THE LASSEN GEYSERS.

Situated about a mile south of Lake Solfatara, lie the Lassen geysers. The geysers and spout hot water to a height of a yard or two. Formerly they sent up columns of water to a height of 25 or 30 feet, and hot spray and steam to twice that height. About four miles west of Lake Solfatara are more of these geysers. They are at an elevation of 6,000 feet and throw up hot water. The bottom of the canyon in which these springs are situated is filled with a creamy mud.

BUMPS HILL.

Two miles southwest of this canyon is a hole in the side of the mountain from which issues hot gases. These contain a great deal of sulphuric acid, and this crystallizing on the surrounding rocks, forms masses of solid sulphur. The ground about the gas vents is quite hot. The whole country is full of old craters, and in the bottom of them are found what the prospecting miners call "blow-holes." These are small, shallow holes that look as if made by a blow from a hammer, either hot or cold gases issue. As far south as the old Meadow Lake District in Nevada county, are found lakes in which dead trees are seen. These seem to have been formed by the sudden subsidence of the ground in little valleys.

ANOTHER EARTHQUAKE.

Similar to that of 1850, seems imminent in this region. In the last year or two the subterranean disturbances have been steadily increasing in magnitude. Now the constant earthquakes have so churned up the springs as to give the water flowing from them the appearance of milk; and Eagle lake, to the north of Susanville, has also assumed a milky hue. The Big Springs, at Big Meadows, which have been constant in their flow ever since first known, are fast drying up. If there is not some great blow-up somewhere about Lassen's peak or long there is, it is useless to study volcanic indications; or, rather, we must say that such as hold good in Europe are meaningless in America.

SNOW PLANT SEASON.

The Virginia Chronicle says snow plants, which are most numerous in the Sierras during May, are still plentiful in the vicinity of Emerald Bay. The plant was first discovered in the Sierras by a naturalist accompanying General Fremont's party to the Pacific slope in 1843. The early development of the plants takes place under banks of deep snow, they coming to the surface as the snow melts away from them. A recent arrival from Emerald Bay brought with him a plant the stem of which is eighteen inches in length. It is kept in snow and looks as healthy as when it was plucked from the place where it grew.

A PROMISING ENTERPRISE.

The Extension of a Nevada Road Into Idaho—What the People of Idaho Say About It.

The Owyhee Avalanche says: We understand from good authority that the Nevada Central Railroad Company will extend their road from Battle Mountain to Boise City. It is only strange that the idea has not been advanced before. Such a road would run through a country rich in minerals, with valleys of fine agricultural lands lying on either side of the road for a great distance of the way. Beside this, the route will pass through as fine a stock country as lies out of doors. Of course the company takes into account these things into consideration, as well as the rich mines lying between Silver City and South Mountain, and undeveloped loads of galena in the last named place.

THE ROUTE.

Will undoubtedly run via Tascara, crossing the plateau near or south of Big Springs, thence to Jordan Valley; thence to Cow Creek; thence up Cow Creek to old Camp Lyon; thence to Sucker Creek; and down that stream to Snake river, and thence to Boise City. The completion of such a road would revive the mining interest in South Mountain and Flint mining districts, and give the company a large carrying trade of ores that cannot now be worked profitably. It would also get all the stock that is now driven to the railroad, which in itself would amount to no small sum. Reaching Cow Creek the line would receive shipments of ores from De Lamar, Wagon town and Cow Creek.

THE COAL MINES.

Now being developed on Sucker Creek would also be a very great incentive for a company building such a road, not to say anything about the passenger traffic, and shipment of goods to our merchants, and machinery of all kinds to mills and mines. Reaching Boise City the line could be extended north into one of the finest timbered countries west of the Rocky mountains, which will supply timber of the finest quality for lumber for 100 years to come; indeed, we know of no enterprise so well calculated to make a corporation rich as the one above mentioned. We hope to see the road constructed and trains running over it within the next four years, and any aid that can be given the company in any way of suggestion, or furnishing a guide to accompany a surveyor through the country will no doubt be furnished upon application.

If the coal found at Sucker Creek is of a good quality there would be a good market for it in Nevada. It would be a godsend for Tascara and all other mining camps in that section of the State. There would also be a great demand for the timber mentioned.

Ranchers "Hogging" Water.

The Virginia Chronicle says the Carson river flow has diminished very rapidly within the past few days, due to ranchers along its course diverting it from its channel to irrigate their land, and wantonly wasting it by diverting a much larger volume of water from its natural course than is required for that purpose. The wood drives have been stranded a long way from their destination and many stamps in the river mills are hung up through lack of motive power on account of the selfish spirit of the ranch owners. A prominent mine Superintendent remarked Wednesday morning: "As we can't reason with the hoggy ranchers we will have to fight them or cease shipping ore."

The Brunswick mill will be operated by steam whenever the water falls and the California battery and pan mills will be ready next week to handle the Con. Cal. & Va. ore now shipped to the Eureka mill.

Cattle Outlook in Nevada.

E. Webb, of the Nevada Land & Cattle Co., writes the San Francisco Bulletin and Live Stock Gazette as follows: It may interest you to know that all the cattle on the range are fat in this part of the country, and the feed is good. Cattle will be in beef condition early, and will have to be sold early otherwise they will get poor on the range. The trouble is the great scarcity of water and cattle in another month from now will have to travel long distances for water, which will take off the flesh, and I think the supplies will thus be got rid of early. Beef from other parts (of this State) will not be in condition and those who have hay to hold their steers until December and January will get good prices. The Nevada L. & C. Co.'s range extends from Eden valley in this county, to the Owyhee in Elko county.

Yellow Jacket East Shaft.

A portion of the hoisting works at the Yellow Jacket east shaft, says the Virginia Chronicle, will be taken down next month. That part over the steam hoist and pump plants will not be disturbed. Last year the old shaft was filled in with waste to a depth of 400 feet to prevent it from caving and swallowing up the costly machinery, which had not the shaft been filled, would have been the inevitable result. The hole made by the cave was capacious enough to swallow up a small-sized town. The pump and hoist plant will not be removed at present.

Oh, No! We Guess Not.

An effort is being made by the Finance Committee to collect an additional sum above that already contributed to the fund for the Fourth of July celebration for the purpose of employing the Reno Cornet Band. This movement meets with general favor and will be liberally responded to, says the Virginia Chronicle, 24th.

The services of Hastings' Cornet Band has been engaged by the Reno Committee to furnish music at home on the Fourth, so the Comstockers will have to get along without the best band in the State.

Bitten by a Rattlesnake.

The Virginia Chronicle is informed that an Indian at Pyramid Lake Reservation, who claims to be a snake charmer, pulled a rattlesnake out of its hole recently and got bit on the finger for his trouble. Whiskey was given him in large quantities until he became very drunk and the chances are that he will pull through, but he is still a very sick Indian.

Notice.

On and after Monday, June 24th, I will sell Soda and Sarsaparilla at 75 cents per case, two (2) dozen in case. Send in your orders.
GEORGE BECKER.

Discoveries of rich gold quartz continue to be made in the region west of Mount Davidson.

MEADOW LAKE DAM.

The California Press Discussing Its Safety.

The terrible result of the bursting of the Conemaugh dam in Pennsylvania has caused a discussion in the San Francisco papers as to the safety of several large dams in Nevada county, California.

The Fordyce dam, at the source of the Yuba river, which forms the body of water known as Meadow Lake, is the largest of these and holds an area of water twice that of the dam at Conemaugh. Should it give way the country for sixty miles from Meadow Lake to Marysville would be swept with a flood that would destroy everything in its path, and even Sacramento might suffer serious damage.

The Fordyce dam has a wall 170 feet in height and the lake behind it has a length of six miles. The dam is provided with flood gates and watchmen are employed to regulate the flow, but as the dam was constructed over thirty years ago it must certainly be in an unsafe condition and a timely inspection of it may avert a serious calamity.

Sierra Fuel Supply.

The wood cut on the Sierras along the line of the Central Pacific railroad will be about 40,000 cords this year against 100,000 in 1871. The difference is not due to the supply being exhausted, but to the fact that all the timber contiguous to the line of the road has been cut for a breadth of several miles on each side of the track. The wood-burning locomotives on the Central Pacific consume 100 cords a month each. The wood costs about \$3.72 per cord delivered alongside of the track.

Advice to Mothers.

Are you disturbed at night and broken of your rest by a sick child suffering and crying with pain of cutting teeth? If so, send at once and get a bottle of Mrs. Winslow's Soothing Syrup for Children Teething. Its value is incalculable. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures dysentery and diarrhoea, regulates the stomach and bowels, cures wind colic, softens the gums, reduces inflammation, and gives tone and energy to the whole system. Mrs. Winslow's Soothing Syrup for Children Teething is pleasant to the taste, and is the prescription of one of the oldest and best female nurses and physicians in the United States, and is for sale by all druggists throughout the world. Price 25 cents a bottle. Feb. 21-31-17.

WHAT ON EARTH

Is the reason people will not, can not or do not use any different, regulate the stomach and bowels, cures wind colic, softens the gums, reduces inflammation, and gives tone and energy to the whole system. Mrs. Winslow's Soothing Syrup for Children Teething is pleasant to the taste, and is the prescription of one of the oldest and best female nurses and physicians in the United States, and is for sale by all druggists throughout the world. Price 25 cents a bottle. Feb. 21-31-17.

When baby was sick,
We gave her Castoria.
When she was a Child,
She cried for Castoria.
When she became Miss,
She clung to Castoria.
When she had Children,
She gave them Castoria.

Dyspepsia

Makes the lives of many people miserable, and often leads to self-destruction. Distress after eating, sour stomach, sick headache, heartburn, loss of appetite, faint, "all gone" feeling, bad taste, coated tongue, and irregularity of the bowels, are some of the more common symptoms. Dyspepsia does not get well of itself. It requires careful, persistent attention, and a remedy like Hood's Sarsaparilla, which acts gently, yet surely and efficiently. It tones the stomach and other organs, regulates the digestion, creates a good appetite, and by thus overcoming the local symptoms removes the sympathy effects of the disease, banishes the headache, and refreshes the tired mind. "I have been troubled with dyspepsia. I had but little appetite, and what I did eat was distressed me, or I did not eat at all. In an hour after eating I would experience a faintness, or tired, all-gone feeling, as though I had not eaten anything. My trouble, I think, was aggravated by my business, which is that of a painter, and from being more or less shut up in a room with fresh paint. Last spring I took Hood's Sarsaparilla—look these bottles, it did me an immense amount of good. It gave me an appetite, and my food relished and satisfied the craving I had previously experienced." GEORGE A. TAGE, Watertown, Mass.

Hood's Sarsaparilla
Sold at druggists.

250 Beautiful Lots For Sale!

A RARE CHANCE FOR AN INVESTMENT AND A HOME.

THE MOST LOVELY PORTION OF RENO.

Facing the Truckee—The Aristocratic Avenue—Riverside Driveway—Splendid Sewerage—Healthy Location and Safe From Fire.

The proprietor is now ready to receive proposals for lots in Powning's Addition. The map gives a good idea of the tract, which is situated between the Central Pacific Railroad and the Truckee River, and commences on the west at a point three blocks distant from Virginia Street, making it the most central and convenient of any portion of the rapidly growing town of Reno. Unlike any other part of the town this Addition faces the beautiful Truckee River and Riverside Avenue is certain to become the fashionable driveway of the country. The streets are 80 feet wide, while Riverside and Keystone Avenues are intended to be 100 feet in width. All alleys are 20 feet wide. The soil is a rich gravelly loam, and susceptible of the highest state of cultivation. Being situated as it is it is more safe from fire than any other section. The regular lots are 50x140 feet. The sewerage is perfect.

Before Buying Elsewhere Parties will do Well to Look at These Lots.

RENO

Reno's geographical position is excellent. It is on the line of the Central Pacific Railroad, only 154 miles from Sacramento, and 244 miles from San Francisco. It is the terminus of the Virginia and Truckee Railroad running south, and of the Nevada and California Railroad running north. It has two Flouring Mills, Planing Mills, three Nurseries, a Soap Factory, Reduction Works, and other industries. A great Woolen Mill and a Sash, Door, Blind and Box Factory, are about to be established.

Reno has the Bank of Nevada with \$300,000 capital, and the First National Bank with \$200,000 capital. It has two fine papers in the DAILY and WEEKLY NEVADA STATE JOURNAL and the Daily and Weekly Gazette.

Reno is the natural home of the Alfalfa, and therefore the great cattle headquarters of the State. Here are fed the prime beef for the California market. Reno potatoes are the best in the world, and she also excels in Strawberries and the small fruits. Reno Wheat took the first prize at the great New Orleans Exposition.

The State Fair is always held at Reno.

Reno is the County Seat of Washoe County, the wealthiest county in Nevada.

FOR SALE.

THE FOLLOWING VALUABLE PROPERTY IS offered for sale by the First National Bank of Reno, Nevada. The property consists of two dwelling houses on Virginia Street, opposite City Hall. Two dwelling houses, northwest corner Virginia and Fourth streets. For full particulars enquire of FRANK GOLDEN, Administrator, 3000 1/2.

NOTICE TO CREDITORS.

NOTICE IS HEREBY GIVEN TO THE CREDITORS of and all persons having claims against the estate of Peter Frank, deceased, to present the same with proper vouchers to H. P. BROWN, Administrator of said estate at his residence on 5th Street in the Western Addition to the town of Reno, Nevada, within three months from the first publication of this notice. By order of the Court Administrator of the estate of Peter Frank deceased March 30, 1889-Jm

RENO

Has no equal in Nevada or California for salubrity of climate, wealth of soil, diversity of products and stability. Situated in the very heart of the celebrated Truckee Meadows the future of Reno is assured. Reno is the City of Homes. There is not a house to rent in Reno. New buildings are occupied as fast as erected. Reno has advantages which no other town can equal. The climate is mild and genial in Winter, and even and healthful in Summer. There are no excessively heated or severely cold terms, and while the days may be warm in Summer the nights are deliciously cool; in Winter sleigh-riding is the exception and not the rule.

Facilities for irrigating surpass any in the State and there is no failure of crops. Reno has Churches of all denominations, Bishop Whitaker's School for Girls Mt. St. Mary's Academy, the State University, and splendid Public Schools.

The Reno Water Co. furnishes ample pure, cold water for all purposes. The Reno Electric Light Co.'s electric light system, already well established, is being augmented. The Reno Gas Co. supplies gas for all purposes. The streets of Reno are lighted by electricity.

REMARKS AND CONDITIONS:

Entries to running purses and stakes must be made to the Secretary on or before August 15, 1889.

Those who have nominated in stakes must name to the Secretary in writing which they will start the day before the race at 6 P. M.

Entries to all trotting and pacing races close Sept 1st.

Five or more to enter, and three or more to start in all races for purses.

National Trotting Association Rules to govern trotting races. Pacific Coast Blood Horse Association Rules to govern running races.

All trotting and pacing races are the best three in five, unless otherwise specified, five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by a withdrawal of a proportionate amount of the purse. Entrance fee, per cent on purse, to accompany nomination.

National Association rules to govern trotting races, but the Board reserves the right to trot 1 1/2 or any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money to be divided as follows: 60% to the first and 40% to the second.

No horse shall receive more than one premium in all purse entries not declared out by 6 P. M. of the day preceding the race shall be required to start.

When there is more than one entry by one person, or in one interest, the particular horse they are to start must be named by 6 P. M. of the day preceding the race. No added money paid for a walk-over.

Racing colors to be named in entry.

In trotting races drivers will be required to wear caps of distinct colors which must be named in their entries.

Each day's races will commence promptly at 1 o'clock P. M.

All entries must be directed to C. H. Stoddard, Reno, Nevada.

THEODORE WINTERS, President.

C. H. STODDARD, Secretary.

SUMMONS.

IN THE DISTRICT COURT OF THE STATE OF NEVADA, in and for the county of Washoe.

The State of Nevada sends to Louis Alexander—

GEO. S. SMITH, vs. LOUIS ALEXANDER.

You are hereby notified to appear in an action commenced against you as defendant by George S. Smith as plaintiff, in the District Court of the State of Nevada, in and for the county of Washoe, and answer the complaint therein within ten days after the service on you of this summons, (exclusive of the day of service), or judgment by default will be taken against you according to the prayer of said complaint. (The said action is brought to recover the sum of fourteen hundred and twenty-seven dollars and twenty-seven cents, and a promissory note for two hundred and fifty dollars and interest thereon from April 1, 1888, and on an account for \$1,027 27, for hay and grain sold and delivered by said George S. Smith to said Louis Alexander between April 1, 1887, and February 6, 1888, all of which will more fully appear from the complaint which is on file in the office of the Clerk of said Court at Reno, in the county and to which you are especially referred.)

And you are further notified, that if you fail to appear and answer said complaint, the said plaintiff will apply to the Court for the relief demanded.

In testimony whereof, we have hereunto set our hands this 22d day of April, A. D. 1889.

CLARKE & JONES, Attorneys for Plaintiff.
